CHROMEBOOK SPECIFICATIONS

Chromebooks should be purchased as part of the regular school supplies for each junior high student. Individuals can often get better pricing than schools through various vendors.

The minimum Chromebook configuration must include: Google Chrome OS; wireless network capability (802.11a/b/g/n); 2GB RAM and 16GB memory; USB port; and 11.5 inch screen. There are many models which meet these criteria.

Refurbished Chromebooks are often better tested than new ones. Parents may receive a \$100 subsidy for the new purchase of a Chromebook. Parents may also choose to use a Chromebook that they may already own, provided that it meets the minimum configuration.

If you purchased a new or refurbished Chromebook for your middle school student, you may request a one-time \$100 subsidy for your purchase. This subsidy will be posted as a credit on your family’s Financial Statement.

To receive the credit, please attach a proof of purchase to this form and return it to the school office. A “proof of purchase” could be a copy of the store receipt, online purchase receipt, credit card statement, or anything that will show a recent purchase for the 2021-22 school year.

Thanks for supporting your child’s use of technology as one of many tools for learning at Holy Angels School.

Blessings,

Anne Weise
Principal
