Handbook 5141.5: The following are the procedures that are necessary when medication for a child needs to be sent to school: 1) Complete necessary form for "Medication Administration" for either prescription drugs or non-prescription drugs. Prescription drugs require a doctor's instruction and signature. Forms are available in the school office. 2) Present medication in its original packaging with the name of the student to whom the medication belongs. Medications are kept in a secure location. 3) Insure that the procedure for taking the medication is printed on the container or bottle, or otherwise included in writing, including possible side effects. 4) Instruct the student to take the medication to the school office. Except where a release has been approved, students may not possess medications. 5) It is the responsibility of the student, if appropriate, not school personnel, to get his/her medication at the designated time.
